

DC Operating Point Analysis

LTspice DC operating-point simulation of a two-resistor voltage divider.

What this demonstrates

The schematic and LTspice operating-point report show $V_{in} = 12\text{ V}$, $V_{out} = 7.2\text{ V}$, and a series current of 2.4 mA through both resistors.

Proof of Skills - DC operating point

.op

```
--- Operating Point ---
V(vin):      12          voltage
V(vout):      7.2        voltage
I(R1):        0.0024      device_current
I(R2):        0.0024      device_current
I(V1):       -0.0024      device_current
```
